Profile:

I am a Full Stack ASP.NET C# Developer with over 3.5 years of experience producing code to a consistently high standard. I am constantly honing my skills within the software development arena and applying my knowledge to implement a range of practical solutions with the utmost efficiency. I possess a proven track record of developing applications and I am seeking a role that will utilise and expand these skills.

Skills Summary:

- C# (MVC, WCF, REST web services, Entity Framework, Devexpress Components)
- Java (Spring MVC, Hibernate ORM Framework, JSP Servlets, JSF)
- Angular JS, Kendo UI.
- SQL Server, MySQL.
- HTML, CSS, JavaScript, JQuery.

Education:

- **2010 – 2013 Gurukul Kangri University**
Masters of Computer Applications.
- **2007 – 2010 Panjab University**
Bachelors of Computer Applications

Employment History:

Software Developer

February 2015 – Present

Valiance Solutions provides software solutions to enterprises globally using technology platforms. We create and deliver services that enhance your business agility. Our leading-edge solutions enable major organizations worldwide to achieve measurable and substantial benefits. Solutions include product development and life-cycle support, process and network engineering, plus data transformation and analytics. Valiance is Head Quartered out of Delhi NCR with satellite offices in US and Singapore.

- Currently working on creating a **Loan Originating System (LOS)** software that automates end-to-end loan origination cycle in a paperless and electronically driven workflow environment in which is a comprehensive solution to facilitate providing loans to users without

any paperwork. Built as per industry requirements, it is agile and adaptable. Developed in (WCF Rest Services and exposed via C# MVC with AngularJS and MSSQL)

- Created and managed a **Home Care Web Application** that provides home care and staffing to senior citizens. Developed in (C# MVC, Entity Framework with MSSQL)
- Created award winning **Call Centre Management System** that delivers call recording, workforce optimization and agent evaluation solutions to meet the requirements of organizations. Developed in (C# MVC with Kendo UI)

Junior Software Engineer

November 2013 - January 2015

Junglee Games is a leading game development company that provides highly entertaining gaming platforms to the community of online players. It offers a variety of popular games like Rummy, Texas Holdem Poker, Howzat Cricket, Teen Patti and other social games.

- Created **Revenue Dashboard** for firm's key offering rummy that tracks company's internal revenue which in turns helped the team to analyze cash inflows and user base. (Developed in C# MVC with Dev Express Components and MSSQL Server)
- Developed lots of tools to automate the recurring work (Generated Bank Payment File).
- Accounted for increase in company's gross revenue four times.

Strengths:

- Team player
- Effective personal communicational skills
- Learning agility
- Problem solver
- Quick learner
- Smart worker

Achievements:

- 1st prize in Code-Mania inter college festival.
- Employee of the month at Valiance Solutions.
- Entitled with task assassinator at Junglee Games.
