Profile:

I am an ASP.NET C# Developer with 3.5 years of experience producing code to a consistently high standard. I am constantly honing my skills within the software development arena and applying my knowledge to implement a range of practical solutions with the utmost efficiency. I possess a proven track record of developing applications and I am seeking a role that will utilise and expand these skills.

Skills Summary:

- C# (MVC, WCF, REST web services, Entity Framework, currently working in WEB API)

- Angular JS, Node JS, Kendo UI, Dev Express Components.

- SQL Server, MySQL.

- Web application development (HTML, CSS, JavaScript, JQuery, Ajax)

- Experience in building applications in SOA environment.

Education:

- **2010 – 2013 Gurukul Kangri University**
  Masters of Computer Applications.

- **2007 – 2010 Panjab University**
  Bachelors of Computer Applications

Employment History:

Valiance Solutions
Software Engineer   *February 2015 – Present*

- Designed and created a **Loan Originating System** using C# MVC, WCF and Angular JS – a comprehensive retail loan origination solution built as per industry requirements, it is agile and adaptable software that automates end-to-end loan origination cycle in a paperless and electronically driven workflow environment.

- Created and managed a **Home Care Application** using C# MVC and MSSQL that provides home care and staffing to senior citizens and it is operational across 60 cities in US.

- Developed a **Business Intelligence Dashboard** using Dev Express components which monitors and tracks the company's sales and to get a better hold of cash inflows. It is an insightful and information rich decision support system for executives.

- Implemented a **Call Centre Management System** using C# MVC and Kendo UI which provides innovative and industry leading call recording and agent evaluation solution that recently was recognized as the best product at ITEXPO at Miami, FL.

- Currently working on creating **Hospital Management System**(HMS) using WEB API, C# MVC and Angular JS which integrates the entire resources of a hospital into one integrated software application. It's a patient centric system that is a fully configurable web based healthcare solution.

Junglee Games

Jr. Software Engineer   *November 2013 – January 2015*

- Developed an automated **Transaction Generator Tool** that generates a file containing bank payment transactions to send money to user's bank accounts. It reduced the transfer time greatly about 80% which resulted in effective cost cutting and hence improved the net profits.
- Created a **Admin Panel** using C# MVC, Entity Framework and MSSQL for firm's key offering Junglee Rummy that tracks company's current revenue and provides real time data insights which in turn helps the team to analyze cash inflows and user base. We incorporated many reports in this product such as customer retention which helped the decision makers to gain visibility around our operations.
- Improved game start up and shut down time by up to 10 seconds by resolving threading bug.
- Tested and debugged several critical components using logging, unit tests.

Strengths:

- Passionate
- Team Player
- Learning agility
- Problem solver
- Quick learner
- Smart worker

Achievements:

- 1st prize in Code-Mania college festival.
- Accounted for increase in company's revenue.
- Entitled with task assassinator at Junglee Games.
